

Rainbow Colours in Your Garden

How are rainbows made?

- To make a rainbow you need sunlight and water.

- The sun must be shining behind you and it must be raining. You can also see a rainbow if a waterfall is in front of you.
- The rainbow will be formed in front of you when the sunlight shines through the water.
- You will see the rainbow arch, which is made of 7 colours: Red, Orange, Yellow, Green, Blue, Indigo and Violet.
- A rainbow is a full circle, but you only see half of it as the rest is hidden by the ground.
- If you are very lucky you can see a circle rainbow when traveling in an aeroplane.

**Can you spot the different colours of the rainbow in your garden?
Don't pick living plants and flowers, instead draw them or take a photo.**

Red

Orange

Yellow

Green

Blue

Indigo

Violet

How many colours did you spot in your garden?
