

## Sink or Float?

### You need

- Washing up bowl or large bucket.
- Small items found in the garden (some ideas below!).
- Recording sheet for the results of your experiment.

### What to do

1. Ask your grown up to help you fill a bucket with water, but not too much!
2. In the garden look for small things that you can drop into the bucket. You may need your grown up to help you.
3. Which things sink to the bottom of the bucket and which float at the top?
4. Write down your guess on a piece of paper.
5. Put the items into the water one a time to find out if you were right.

**Don't forget to wash your hands after being in the garden!**
