

# Digging in your Garden

## Planting Seeds

### You need

- Soil & compost
- Garden tools
- Watering can
- Quick planting seeds such as sunflowers, watercress or salad

### What to do

- Find a container or area of the garden to plant your seeds.
- Mix the soil and compost together.
- Make a shallow hole for your seeds.
- Plant your seeds making sure they have space between them.
- Water them gently.
- Regularly check your seeds and water them when the soil is dry.

**Make sure you wear old clothes and shoes.  
Remember to wash your hands afterwards!**

**You could also dig a track for your cars or a safari park for your animals!**
